Downloading AnyConnect

Open a web browser and go to "anyconnect.mst.edu"

Log in only your SSO for your username and enter your password. Then, click "Next"

Click "Continue"
Once the page is done inspecting your computer, select the link titled “Windows Desktop” and the AnyConnect installer will begin to download.

Run the installer. Once it is complete, open the Start Menu and search “Cisco AnyConnect” to find and run the VPN software.
Connecting the VPN

A small window will open. In the empty field, enter “anyconnect.mst.edu” and click "Connect."

Log in using your SSO and your password. Then, click "OK".

Click "Accept"
Cisco AnyConnect

AnyConnect will then show the below message to confirm that you are connected to the VPN.
